PROFILE

Full stack developer (MERN) with hands on experience building and deploying multi role web applications, including authentication systems, payment gateway integrations, real time features, and AI assisted functionality. Currently a Full Stack Developer Intern at Zidio Development, building an AI powered customer feedback platform. Consistent academic topper pursuing a Bachelor's in Computer Application at Tribhuvan University, with additional experience in UI/UX design, competitive security (CTF), and hackathon team projects.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern, Zidio Development 07/2026 - Present, Remote

Working as a full stack developer on Project LOOP, an AI powered customer feedback intelligence platform, as part of a two person team.

- Integrated the Google Gemini AI SDK to power feedback sentiment and theme classification, and automated VOC (Voice of Customer) report generation with risk matrix and evidence sections.
- Built a multi turn "Ask LOOP" conversational AI feature for querying feedback data in natural language.
- Refactored backend REST APIs (feedback, reports, ingestion, member invites) for transaction safe, ACID compliant database operations.
- Added security hardening across the API layer: rate limiting, HTTP security headers, and XSS protections.
- Built a CSV bulk feedback importer and resolved a production deployment issue on Vercel.

Data Entry Operator, IIMI Asia Pacific Pvt. Ltd. 05/2024 - 09/2024, Remote

Accurately entered, updated, and maintained large volumes of data while ensuring quality, consistency, and confidentiality under strict deadlines. Supported administrative reporting tasks with close attention to detail.

PROJECTS

CricketNepal, Full Stack eCommerce Platform Live: cricket-nepal-kappa.vercel.app
GitHub: sonuthakur03/cricketNepal

Built a multi role (buyer, seller, admin) MERN e commerce marketplace for cricket equipment with JWT authentication, Cloudinary image uploads, and three integrated payment gateways (Khalti, eSewa, Stripe). Implemented server side stock reservation and role based order management. Deployed live on Vercel and Render.

Project LOOP, AI Customer Feedback Intelligence Platform GitHub: sonuthakur03/loop

Built as part of a full stack internship at Zidio Development. Integrated the Gemini AI SDK for automated sentiment and theme classification and analyst grade VOC report generation, plus a multi turn AI chat feature for querying feedback data. Added backend transaction safety, rate limiting, and security headers across the API layer.

PublicCare, Civic Complaint and Hygiene Management Platform GitHub: sonuthakur03/PublicCare

Built in a 3 day team hackathon (Embark Community Innovation Hackathon, Embark College). A civic tech platform letting citizens report public health and infrastructure issues with GPS pinned locations and photo evidence, with automated priority escalation once multiple citizens verify the same issue. Connects municipal staff with private contractors through an integrated tendering system, with real time updates over WebSockets. Built the authentication and user management system and the vendor and tendering module, and led a security hardening pass before submission.

StudyTrack Nepal, Study Progress Tracker Live: study-tracker-gules-delta.vercel.app
GitHub: sonuthakur03/study-tracker

Built a full stack MERN app for tracking learning progress with automated daily email reminders. Implemented JWT authentication, a streak tracking system, and scheduled email digests using node cron and Nodemailer, plus an admin panel for content management.

Quizify, React Quiz Application Live: quiz-bizz-quiz-webapp.vercel.app
GitHub: sonuthakur03/QuizBizz

Built a quiz application in React and Tailwind CSS that dynamically fetches questions from the Open Trivia Database API, supports multiple question types and difficulty levels, and stores quiz history using localStorage.

TravelNP, Travel Planning App UI/UX Design Figma: figma.com/design/K4bc1L7tnImrWXYh85Qojs/travelnp

Designed a full UI/UX flow in Figma for a travel management platform where travelers can discover hotels, guides, and famous locations near a hotel, while hotels can self register and list their own property. Designed the landing page and the complete user flow, using Figma's prototyping and screen to screen interactive connections to simulate real navigation.

EDUCATION

Bachelor's of Computer Application (BCA), Tribhuvan University 12/2023 - Present

Kathmandu, Nepal. Focus on programming, web development, and database management. CGPA: 3.63/4.0, Rank 1 in every internal and board examination to date.

Higher Secondary (SLC/NEB), Viswa Niketan Secondary School 06/2021 - 04/2023

Kathmandu, Nepal. Management stream with Computer Science as major.

SKILLS

Languages: JavaScript, Java, Python, PHP, C

Frontend: React, Next.js, Tailwind CSS, HTML/CSS

Backend: Node.js, Express, Django, .NET

Database: MongoDB, MySQL, Prisma, DBMS fundamentals

CS Fundamentals: Data Structures and Algorithms, Application Security

AI Tools: Claude, Claude Code, Antigravity, AI SDK integration

Other: JWT Authentication, REST APIs, Git/GitHub, Cloudinary, Payment Gateway Integration (Khalti, eSewa, Stripe), Figma/UI-UX Design, Project Management

CERTIFICATES AND ACHIEVEMENTS

BugV CTF 2026, 3rd Place Swoyambhu International College

Solo capture-the-flag security competition; solved challenges using AI-assisted tooling.

Embark Community Innovation Hackathon Embark College, Jul 27-29, 2026

3 day team hackathon; built and presented PublicCare, a civic complaint management platform.

UI/UX Design Training, 30 hours Swoyambhu International College, 07/2024 - 10/2024

Python with Django, 30 hours Swoyambhu International College, 01/2025 - 02/2025

LANGUAGES

Nepali, Mother tongue **English**, Fluent **Hindi**, Fluent
